PROFESSIONAL SUMMARY

Staff Frontend Engineer with 10+ years of experience directing UI architecture and frontend infrastructure at scale for top-tier tech environments (Meta, Google). Specialized in GenAI integrations, LLM orchestration (RAG, agentic workflows), and designing high-performance streaming interfaces using React, Next.js, and TypeScript. Proven track record of architecting org-wide engineering standards, improving system latency by 30%+, mentoring senior talent, and delivering scalable enterprise applications serving billions of global users.

PROFESSIONAL EXPERIENCE

Blue Ocean Technology, LLC **Jan 2025 – Present**
Staff Frontend Engineer, AI & Infrastructure | Remote, USA

- Architected unified Next.js/React frontend infrastructure across 15+ concurrent enterprise mid-market applications, accelerating cross-team feature delivery speed by 40% while maintaining a 97% CSAT.
- Spearheaded the integration of Vercel AI SDK and LLM streaming into internal and client-facing dashboards, utilizing server-sent events (SSE) to reduce perceived AI response latency by over 50%.
- Directed the deprecation of legacy monolithic codebases, establishing a modular monorepo architecture with shared Tailwind CSS/Storybook component libraries, reducing new project onboarding time from weeks to days.
- Engineered Python-based automated CI/CD deployment pipelines, robust state-management patterns, and automated performance telemetry systems, recovering 600+ engineering hours annually.

Wolf Careers Inc. **Mar 2019 – Dec 2024**
Lead Frontend Engineer | Chicago, IL, USA

- Led a team of 8 engineers in rebuilding a Fortune 500 HR platform using React, TypeScript, and Supabase, increasing candidate application completion rates by 18% and overall user engagement by 25%.
- Designed and deployed a Python/Flask REST API to automate resume parsing and multi-modal candidate scoring, cutting manual recruiter review time by 40%.
- Architected scalable vendor management systems securely integrating Workday and Greenhouse ATS APIs, decreasing cross-platform data synchronization errors by 25%.
- Drove technical excellence across all client projects by standardizing state management (Redux Toolkit) and implementing strict React Testing Library workflows, reducing average sprint delivery cycles by 15%.

Meta Platforms, Inc. **Aug 2016 – Feb 2019**
Senior Software Engineer (E5), Frontend Infrastructure | Menlo Park, CA, USA

- Orchestrated critical rendering path optimizations for Ads Manager (React/Redux), an interface processing $4B+ in annual ad spend. Reduced Time to Interactive (TTI) by 2.3 seconds on low-bandwidth networks.
- Pioneered a Python-based automated visual regression testing framework integrated directly into CI/CD pipelines, successfully blocking 95% of UI regressions from reaching production environments.
- Directed the migration of 9 legacy Webpack-based architectures to modern build tools (Vite), reducing average build times by 18% and significantly enhancing developer experience (DX) and hot-module replacement.
- Mentored 5 mid-level engineers, instituted rigorous code review governance, and defined Git workflows that lowered production bug rates by 30%.

Google LLC **Jun 2013 – Jul 2016**
Software Engineer III (L4), Frontend Learning | Mountain View, CA, USA

- Engineered real-time streaming UI components for AI-assisted writing models within Google Docs, achieving sub-200ms perceived latency for over 3 billion global users.
- Improved Lighthouse performance scores by 38% (68 to 94) by rebuilding and tree-shaking the shared React component library across 12 distinct Google Workspace product surfaces.
- Developed a Python/FastAPI telemetry pipeline processing large-scale user interaction data to fine-tune behavioral recommendation models, increasing AI feature engagement by 21% QoQ.
- Championed robust testing cultures, elevating unit test coverage from 52% to 89% and resolving 400+ WCAG 2.1 AA accessibility violations across core platforms.

SELECTED AI & SYSTEMS PROJECTS

Beam AI – Enterprise AI Agent Framework
Python, AWS, Redis, LLM Orchestration, SSO/MFA

- Architected an enterprise-grade agentic framework enabling non-technical teams to compose auditable automated workflows integrated securely with CRMs, internal APIs, and ticketing systems.
- Delivered comprehensive SOC2-compliant auditability by integrating granular per-agent credential scoping, fine-grained permission controls, and real-time interactive traces of all LLM tool calls.

Butterflies AI – Generative Social Network Platform
Next.js, FastAPI, TypeScript, RAG, WebSockets

- Sustained high-throughput AI character conversations by engineering a generation pipeline that fused RAG, session memory stores, and real-time safety guardrails into a single highly-available FastAPI service.
- Optimized real-time social feed rendering under peak concurrent load utilizing edge-cached Next.js routes, React server components, and WebSockets tuned for high fan-out reads.

Yolo Health - Digital Health Platform
React, Tailwind CSS, ShadcnUI, Node.js, Supabase, AWS

- Delivered adaptive clinical assessment, goal-setting, and long-term check-in member flows using React and Tailwind CSS, compatible with multiple coaching models while maintaining low-friction mobile experience.

- Eliminated engineering dependency for routine workflow changes by building a personalization engine aggregating biometric data, journal entries, and engagement signals into a deployable recommendation profile.
- Achieved full HIPAA compliance across the product stack by implementing AWS infrastructure with strict access controls and audit logging.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, HTML5, CSS3, SCSS
- **Frontend & UI:** React, Next.js, Redux Toolkit, Zustand, Tailwind CSS, ShadcnUI, Framer Motion, Storybook
- **AI & Machine Learning:** Vercel AI SDK, RAG Architecture, LLM Orchestration (LangChain, LlamaIndex), OpenAI / Anthropic APIs, AI Agent Frameworks, TensorFlow.js
- **Backend & Data:** Node.js, Express, FastAPI, REST APIs, GraphQL, WebSockets, Supabase, PostgreSQL, Redis
- **Infrastructure & DevOps:** AWS (S3, Lambda, CloudFront, EC2), Vercel, Docker, CI/CD, GitHub Actions, Vite, Webpack
- **Testing & Quality:** Jest, Cypress, React Testing Library, Playwright, WCAG 2.1 Accessibility

EDUCATION

Stanford University Sep **2009 – May 2013**
Bachelor of Science in Computer Science | Stanford, CA
